

NOTICE: HABITAT RESTORATION

Habitat restoration and development will begin on April 8 and will continue for approximately 2 weeks. Please be aware that trail access in the highlighted areas will be closed during active working hours, this area should be avoided by visitors. We recommend checking our Audubon Greenway webpage before visits. We will keep this site updated with the latest development activities, which will largely take place during business hours.

We're always proud of the benefits Audubon Greenway offers to enhance our communities' quality of life. Audubon Greenway creates a beautiful space for nature to thrive and for us to enjoy while hiking, biking, birding, dog-walking, and attending environmental education events for all ages. Beyond these benefits, this young forest restoration site will improve biodiversity and improve local ecosystems. Please be patient with the work and feel free to utilize the parts of the property that aren't being worked on.
